

Cisco Security Agent Version 6.0

PB458614

Product Overview

Cisco® Security Agent 6.0 is the first endpoint security solution that combines zero update attack defense, policy driven data loss prevention, and signature based antivirus detection in a single agent. This unique blend of capabilities defends servers and desktops against sophisticated zero-day attacks, and enforces acceptable-use and compliance policies within a simple management infrastructure.

Table 1 lists features of Cisco Security Agent Version 6.0.

Table 1. Cisco Security Agent Version 6.0 Features

Feature	Description
Data Loss Prevention	Confidential data and the integrity of the system is protected against data loss from end user actions or targeted malware
Signature-Based Antivirus	Malware is identified by name, allowing a high degree of confidence in removal from the endpoint
Simplified Management Interface	Simplified management console offers ease of deployment and ongoing maintenance

New Features

Additional new features of Cisco Security Agent Version 6.0 include:

- Additional Windows platform support of Microsoft Vista for Cisco Security Agents
- Dynamic Windows service shielding for protection against network buffer overflow attacks
- Enhanced policy updates for rapid deployments and ease of use
- Updated reporting, graphing, and event analysis capabilities
- Performance improvements for servers with high traffic input and output
- Agent user interface updates for increased end-user satisfaction
- Standalone agent configuration enhancements

Upgrade Paths

Cisco Security Agent Version 6.0 provides new features and an upgrade path for all existing Cisco Security Agent customers. All Cisco Security Agent customers who have purchased Cisco Software Application Support plus Upgrades (SAU) are entitled to upgrade from prior versions of Cisco Security Agent Version to Cisco Security Agent Version 6.0.

Availability

Cisco Security Agent 6.0 will be available in August 2008.
